JBoss Tools vs Developer Studio | JBoss.org Content Archive ...

Many Hibernate users would like for us to reference the JBoss Maven repos in the build scripts. Seems logically, you'd like the build to work "out of the box". However that's a no-no in Maven

because the pom that gets used to build the project is the same one that gets installed and deployed into the repositories.

Gradle: why?| JBoss.org Content Archive (Read Only)

For specifics, refer to Section 13.2.3.4, "Create the Hibernate Configuration File in Red Hat JBoss Developer Studio". Add these lines of XML to the hibernate.cfg.xml file in your application. The XML needs to be inside the <session-factory> tags:
