A coat color dilution, called lilac, was observed within the Jacob sheep breed. This dilution results in sheep appearing gray, where black would normally occur. Pedigree analysis suggested an autosomal recessive inheritance. Whole-genome sequencing of a dilute case, a known carrier, and sixteen non-dilute sheep was used to identify the molecular variant responsible for the coat color change ...

PRC2 mutations are associated with resistance to mitochondrial apoptosis in human T-ALL. (A) T-ALL blasts were collected before the initiation of chemotherapy from children treated on DFCI 05001 or COG AALL0434 clinical trials, and BH3 profiling analysis was performed to assess mitochondrial apoptotic priming, based on the degree of mitochondrial depolarization in response to 0.3 μ M BIM peptide.
