Learn biology chapter 16 evolution populations with free interactive flashcards. Choose from 500 different sets of biology chapter 16 evolution populations flashcards on Quizlet.

### biology chapter 16 evolution populations Flashcards and ...

The process of evolution occurs only in populations and not in individuals. A single individual cannot evolve alone; evolution is the process of changing the gene frequencies within a gene pool. Five forces can cause genetic variation and evolution in a population: mutations, natural selection, genetic drift, genetic hitchhiking, and gene flow.
