Early computer networks used cable to connect computers together in a wired network. Most modern networks use wireless (wi-Fi) as the main connection media and networks tend to be a mixture of wired and wireless. The diagram below shows a wired Ethernet network. To work each device must be connected to a Ethernet hub or switch.

Basic Home Networking Course for Beginners

Wired networks use Ethernet over UTP cable and tend to be faster than wireless networks, which is an important consideration if you are a gamer. The simple wired home network diagram below shows a minimum setup with a switch and broadband router.

How to Set Up a Home Network- Beginners Guide

Sysadmin Computer networking is a means by which computers are interconnected to share data and information, resources, and all other network devices such as printers. Computers, as we now know, apply to all fields of endeavors, be it agriculture, education, medicine, technology, transportation, and so on.
