### Rainbow - Clothing, Shoes and Accessories for Women, Plus ...

A rainbow is a meteorological phenomenon that is caused by reflection, refraction and dispersion of light in water droplets resulting in a spectrum of light appearing in the sky. It takes the form of a multicoloured circular arc. Rainbows caused by sunlight always appear in the section of sky directly opposite the sun.

### Rainbow - Wikipedia

Rainbow, series of concentric coloured arcs that may be seen when light from a distant source—most commonly the Sun —falls upon a collection of water drops—as in rain, spray, or fog. The rainbow is observed in the direction opposite to the Sun. Rainbow over South Park, Colo. ©Denver Metro Convention & Visitors Bureau

### rainbow | Definition, Formation, & Facts | Britannica

Technically, a rainbow is the upper half of a circle of light, which centers on the antisolar point, the point directly opposite the Sun, as seen from your perspective. The lower half of the circle, however, is usually not visible since the water droplets hit the ground before it can form.

### What Is a Rainbow?

noun a bow or arc of prismatic colors appearing in the heavens opposite the sun and caused by the refraction and reflection of the sun's rays in drops of rain. Compare primary rainbow, secondary rainbow. a similar bow of colors, especially one appearing in the spray of a waterfall or fountain. any brightly multicolored arrangement or display.

### Rainbow | Definition of Rainbow at Dictionary.com
